

Real Estate

Real Answers For Your Real Estate Issues

When it comes to commercial real estate, trust Aaron & Partners to provide practical, comprehensive solutions – whatever property related issue you’re facing.

Real estate is a dynamic market where opportunities present themselves on a regular basis although opportunity may not be without risk.

Whether your interests are in commercial development, property management, acquisitions and disposals, resolving disputes, planning, environmental or waste, our Real Estate Team provides a one-stop solution from recognised experts in their field.

Our lawyers take the time to understand and appreciate your objectives and commercial drivers. We are sensitive to the different requirements of corporate users (where the property is a means to an end, not the end itself), those involved in regeneration, and those concerned with the development of property.

Real estate deals are often complex and challenging, but our insight means we can quickly assess which issues will be more problematic than others. Our knowledge of current legislation means that your transaction will be based on solid legal foundations – leaving you to concentrate on building your business.
